

Migrating To DUO Authentication

Steps to be followed:

- 1) Install Duo Mobile App in your mobile from PlayStore - Android Mobile Users OR Apple Store - IOS Users , below attached the screenshot for the same.

- 2) Go to the below URL in your Cisco Laptop/PC and click on Enroll to register your mobile number as per your mobile type (Android/ IOS/ Other) and follow the steps as it suggested.
<https://disco.cisco.com/>
- 3) Post that you will be notified 3 options "Push code", "Call me", "Enter the Pass code". Push code may not work for couple of Android Mobiles (due to encryption would need additional settings change in mobile); Call me and Passcode option works for all the mobiles.
- 4) After everything is done DUO is configured in your laptop and you can use it.

If you still face any issue you can raise ticket by using below hyperlink or respond back to the e-mail!
